

AVR 2650

7.1-channel, 95-watt audio/video receiver with HDMI® v.1.4a with 3-D, Deep Color and Audio Return Channel

If you're looking for an AVR packed with next-generation technology, look no further than the Harman Kardon AVR 2650. The AVR 2650 has an impressive list of features that take home entertainment to the next level. With HDMI® v1.4a for 3-D, Deep Color and Audio Return Channel, and all the latest Dolby® and DTS® audio modes, the AVR 2650 lets you experience a new dimension in TV viewing – all while our own Logic 7® processing creates an exhilarating 360-degree soundstage via 7.1-channel surround sound. And this AVR does far more than just movies and soundtracks – it can even be set to power a Zone 2 speaker system for multiroom audio. With five HDMI inputs, extensive video and audio connectivity, and the ability to connect with The Bridge IIIP for iPod/iPhone playback, the AVR 2650 solidifies itself as a versatile receiver that can accommodate your every entertainment whim with grace, style and ease.

Features	Advantages	Benefits
HDMI® v.1.4a with 3-D, Deep Color and Audio Return Channel	Plays 3-D home entertainment when used with a 3-D TV and a 3-D Blu-ray Disc™, cable or satellite video source	Full compatibility with the latest 3-D video sources Simple connection to TVs with Internet-based programming
Powers an entire 7.1-channel surround-sound system	Uses a high-current-capability (HCC), ultrawide-bandwidth amplifier design for accurate, dynamic sound	Offers 95 watts of power per channel to create an emotionally charged home theater experience
Network connectivity	Streams media files from your home network and Internet radio stations when used with a broadband connection	Gives you access to a world of online music and entertainment via your home network
Dolby Volume	Maintains the same volume level regardless of changes in the program and even when you change channels	Entertainment sounds clean, balanced and precisely as the artist intended it to – at all volumes
Dolby TrueHD and DTS-HD Master Audio™ decoding	Delivers high-definition sound to match the high-resolution video of Blu-ray Disc recordings	Provides a superb surround-sound experience
Logic 7 processing	Transforms movies, TV shows and ordinary stereo sources such as CDs and iPod devices into 7.1-channel surround sound – while making listening fun	Creates a realistic 360-degree soundstage Supplies optimal sound for movies, music and games
The Bridge IIIP connectivity (The Bridge IIIIP is optional)	Plays entertainment from your iPod or iPhone device on your home theater system	Infinitely expands your home entertainment choices Achieves greater sound than is possible on your computer Is convenient and easy to use
EzSet/EQ™ processing	Automatically tailors individual speaker volume levels to specific room conditions	Elicits best possible audio performance Saves you money, since it does the job of an experienced technician
Multizone functionality	SBL and SBR amps can be set to power Zone 2 speakers – providing audio in multiple rooms throughout the house	Makes it convenient to set up multiroom audio Gives you the performance of an additional amplifier – without requiring you to buy one
Surround-sound decoding	Decodes all popular Dolby Digital and DTS soundtracks, as well as Dolby Pro Logic® IIz, adding a new depth of sound	Adds a new dimension to the surround-sound experience Lets you experience theater-quality sound Dolby Pro Logic IIz lets you add front height channels for 3-D sound
Five HDMI inputs	Offers extensive digital video connectivity with other systems so you can connect your whole system to the AVR	Maximizes audio/video performance Reduces connection confusion

AVR 2650

7.1-channel, 95-watt audio/video receiver with HDMI® v.1.4a with 3-D, Deep Color and Audio Return Channel
